Executive Summary

Computer Science undergraduate focused on building secure, scalable, and efficient software solutions, particularly for finance-oriented applications. Proficient in application development, database design using SQL, and cloud platforms, with emphasis on data accuracy, system robustness, and resilient architecture. Adept at working in collaborative environments to design, develop, and support enterprise-grade systems that enable reliable and high-impact business operations.

Education

B.Tech in Computer Science and Engineering – KL University <i>Expected Graduation: 2027 CGPA: 9.00</i>	07/2023 – Present
Intermediate – Narayana Jr. College <i>Year of Completion: 2023 CGPA: 8.50</i>	07/2021 – 07/2023
SSC – Vivekananda English Medium School <i>Year of Completion: 2021 CGPA: 9.89</i>	07/2020 – 07/2021

Skills

Languages

C,Python (Basic), Javascript

Web Technologies

ReactJS, HTML, CSS

Developer Tools

AWS, Docker, Kubernetes,Jeniks, Spring Tool Suite, Cisco Packet Tracer, MS Office,GitHub

Projects

Car Rental Management System (React.js + AWS + DevOps)

- Engineered a full-stack application with authentication, CRUD operations, and database management.
- Deployed on AWS with Docker and implemented CI/CD pipelines via Jenkins for scalability and automation.
- Implemented role-based access control (RBAC) for secure and controlled system access.

Cloud Based File Optimaztion Using AWS

- Built a cloud-based file optimization system DammyPDF using Amazon S3, AWS Lambda, and Amazon CloudWatch to compress files and manage processing workflows. Implemented monitoring and validation pipelines with CloudWatch logs/metrics to improve performance, reliability, and stability

Certificates

NPTEL Cloud Computing (Elite) – IIT Kharapur
Completed: October, 2025

Oracle Cloud Infrastructure Data Science Professional
Completed: 2025
